

Discover solutions and challenges  
on the way towards the  
integrated industry of tomorrow!

Workshop of the European Project CPSoS

# Cyber-physical Systems of Systems The Next Challenge

Tuesday, 26.04.2016, 10:00 - 14:00

Hannover Messe 2016, Hannover, Germany  
Convention Center (CC), Hall 17

## Background

The next generation of industrial systems and infrastructures will be

- **Smart,**
- **Globally networked,**
- **Highly integrated,**

responding to the challenges that the world faces today, such as demographic change and resource and energy efficiency.

These **cyber-physical systems of systems** will require **new engineering and management methodologies** that are not established today.

## Join Us To ...

- ... discuss **the way forward** for the engineering and management of **large-scale cyber-physical systems of systems** from the perspective of different sectors (**electric grids, logistics, industrial automation, manufacturing, ...**), and to
- ... learn about and discuss **research and innovation priorities for cyber-physical systems of systems** that are proposed by the ARTEMIS Association and by the European project **CPSoS** (<http://www.cpsos.eu/roadmap>),

in a relaxed atmosphere with fingerfood and refreshments.

## How To Participate

Participation is **free of charge** to Hannover Messe ticket holders.

**Visit us and join the debate!**

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no. 611115.

## Agenda

- 10:00** Arrival and Coffee
- 10:15** **Cyber-physical Systems of Systems – The Next Challenge**  
 Sebastian Engell, TU Dortmund, Germany
- 10:30** **Cyber-physical Systems of Systems in Electric Power Systems and Networks**  
 Patrick Panciatici, RTE, France
- 10:50** **Cyber-physical Systems of Systems in Industrial Automation**  
 Alf Isaksson, ABB, Sweden
- 11:10** **The Next Generation in Automated Material Handling Systems: Autonomous Shuttles**  
 Joost van Eekelen, Vanderlande, Netherlands
- 11:30** **Cyber-physical Systems of Systems Challenges in Manufacturing**  
 Haydn Thompson, THINK Wireless Technologies, UK
- 11:45** **Cyber-physical Systems of Systems in the ARTEMIS Strategic Research Agenda**  
 Laila Gide, Thales, France
- 12:05** **The Way Forward - Medium-term Research and Innovation Priorities in the Engineering of Cyber-physical Systems of Systems**  
 Sebastian Engell, TU Dortmund, Germany
- 12:20** Discussion
- 12:45** **Networking Session**  
with fingerfood and beverages
- 14:00** End of Workshop

## CPSoS Publications

- Download our **roadmap** here:
